June 18, 2025

## getting started

Welcome to the docs. This is a bold start. Let's see what markdown can do.

### features

- automatic page breaks
- beautiful headings
- code blocks with syntax highlighting
- tables that don't look like spreadsheets from 1999
- blockquotes for emphasis
- links that stand out
- lists, both ordered and unordered

### quick code

```
1 def hello(name):  
2     print(f"Hello, {name}!")  
3 hello("world")
```

### a table of possibilities

feature	supported	wow factor
headings	yes	high
lists	yes	medium
code blocks	yes	high
tables	yes	high
blockquotes	yes	subtle

### a quote to remember

Simplicity is the soul of efficiency. — Austin Freeman
